5.3.2 MESSAGE RATE TRUNKS

A. Hotel Branch Exchange Service

1. Transient Hotel Service is hotel branch exchange service furnished for the joint use of the management and guests at hotels and motels which serve the transient public.
2. Any class or grade of business service may be furnished to the hotel in addition to the hotel branch exchange service.
3. The hotel is responsible to the Company for all charges, at regular tariff/price schedule rates, for exchange service and facilities furnished at the hotel's request, and for telephone messages, telegrams, cablegrams and radiograms:
 - Sent paid from, or received collect at, stations of the hotel branch exchange, whether sent or received by the hotel for its own account or by or for others, or
 - Originated or received by a hotel guest and billed to the guest's hotel account.
4. Commercial flat rate trunks, at applicable trunk rates, may be associated with transient hotel branch exchange service.

5.3 PRIVATE BRANCH EXCHANGE TRUNKS AND NETWORK ACCESS REGISTERS

5.3.3 FLAT RATE TRUNKS (CONT'D)

B. Rate Stabilized Flat PBX Trunk

1. Description

Rate Stabilized Flat PBX Trunk is an optional plan offered for Flat PBX Trunk customers only. The rate levels are determined by two elements: the total number of PBX trunks at a single customer location and the period of the Rate Stability Plan as agreed to by the customer and the Company. The Rate Stability Plan is subject to the Termination Liability/Waiver Policy set forth in 2.2.14.B., preceding.

2. Terms and Conditions

- a. A customer subscribing to the Rate Stability Plan agrees to a specified rate, based upon the number of trunks at a single customer location and a specified rate stability period. The customer must subscribe to at least 20 trunks at the primary or secondary location in order to qualify for the Rate Stability Plan.
- b. Terms and conditions, rates and charges as specified elsewhere will apply as appropriate.
- c. The Rate Stability Plan will be offered subject to the availability of existing facilities.
- d. The minimum stabilized period for this plan is 12 months.

5. EXCHANGE SERVICES

5.3 PRIVATE BRANCH EXCHANGE TRUNKS AND NETWORK ACCESS REGISTERS

5.3.3 FLAT RATE TRUNKS

B.2. (Cont'd)

- e. The Rate Stability Plan charges will be guaranteed against Company initiated changes during the length of the Plan. This Rate Stability Plan provides discount rate stability for the analog transport loop portion of service only.
- f. Termination charges may apply, as specified in 2.2.14.B., preceding, if the customer violates the regulations of the Rate Stability Plan or the Rate Stability Plan is terminated for cause by the Company.
 - A customer will be considered to have violated the regulations of the Plan if the customer cancels service during the term of the Rate Stability Plan or reduces the number of trunks at the customer location to a level 20% below that in service at the rate stability initiation.
 - The Rate Stability Plan may be terminated for "cause" if the Company provides the customer with 30 days written notice specifying the cause for termination and the customer does not comply with the requirements specified in the notice within the 30 day period. "Cause" constitutes any customer material breach of the terms of the Plan including, but not limited to, failure to pay applicable charges on time.
- g. Termination charges apply regardless of the reason for the Rate Stability Plan violation, including closure or sale of the business.
- h. Additional trunks purchased during the rate stability period can be incorporated into the terms of the existing Plan without renegotiating the Plan. If a lower rate is applicable due to the additional number of trunks, the larger discount will be applied once the trunks are in service, until the conclusion of the Plan.

5. EXCHANGE SERVICES**5.3 PRIVATE BRANCH EXCHANGE TRUNKS AND NETWORK ACCESS REGISTERS****5.3.3 FLAT RATE TRUNKS**

B.2. (Cont'd)

- i. If a customer's business is moved during the Plan period, the Plan may remain in effect as long as the new location is served by the Company and the minimum number of PBX trunks is maintained. If a customer qualifies for distance sensitive pricing, charges at the new location will reflect the distance associated with that new location.
- j. In the event a customer's business is sold, the Rate Stability Plan may be transferred to the new owner, if the following conditions are met:
 - The Company is notified in advance of the sale and a "Change of Responsibility" form is issued;
 - The new customer assumes the liabilities and terms of the existing Plan which are in effect at the time of transfer;
 - Existing facilities remain in place;
 - A "Change of Responsibility" agreement is signed by both parties and notarized; and
 - The transfer of responsibility is accepted by the Company.
- k. The nonrecurring charge to establish or transfer Service will be the same in amount and application as applies for trunks.
- l. Once the Rate Stability Plan period ends, the customer may negotiate a new Plan or continue service under month-to-month rates in effect at that time.

5. EXCHANGE SERVICES

5. EXCHANGE SERVICES**5.3 PRIVATE BRANCH EXCHANGE TRUNKS AND NETWORK ACCESS REGISTERS
(CONT'D)****5.3.4 DIRECT-INWARD-DIALING (DID) SERVICE**

A. Description

DID Service is a special trunking arrangement which permits incoming calls from the exchange network to reach a specific PBX station directly without an attendant's assistance.

B. Terms and Conditions

1. *DID* is available in those central offices that have been equipped for the service.
2. Foreign central office mileage charges will apply if a customer is provided *DID* from a foreign central office, except they will not apply to the provision of *DID* if two or more customers in the same central office subscribe to the service or if a single customer in a central office subscribes to more than 1,000 *DID* numbers, and at the option of the Company the service is furnished from a foreign central office in the same exchange.[1]
3. As provided in Section 4, construction charges apply where equipment or facilities required to provide a requested service are not available. Construction charges will not apply to the provision of *DID* if two or more customers in the same central office subscribe to the service or if a single customer in a central office subscribes to more than 1,000 *DID* numbers.

[1] Waiver of foreign central office mileage charges for *DID* Service, under the provisions described in 2., above, will no longer be offered as of October 1, 1985, with the exception that it will continue to be offered to those existing customers who established their service under the provisions cited above, and for additions that those same subscribers may make to their system at the same location.

5. EXCHANGE SERVICES

5.3 PRIVATE BRANCH EXCHANGE TRUNKS AND NETWORK ACCESS REGISTERS

5.3.4 DIRECT-INWARD-DIALING (*DID*) SERVICE

B. Terms and Conditions (Cont'd)

4. The charges applicable to *DID* contemplate the use of standard Company equipment and serving arrangements. When equipment or service of a special type is requested and provided, rates and charges based on the additional costs involved to meet the requirements of each case will apply.
5. One primary directory listing will be furnished with *DID*. Additional listings of departments, locations, titles and individuals may be provided at the charges and in accordance with the terms and conditions set forth in 5.7.1 of the Exchange and Network Services Price List No. 2.
6. The rates and charges specified are in addition to the rates and charges for other services or facilities with which this service is associated.
7. The Company will assign line numbers for *DID* in blocks of 20 numbers. When additional numbers are required, they will be made available as soon as the Company has equipment available for this purpose. The Company does not guarantee that line numbers will be made available in all cases.
8. Sequential numbers may be assigned if blocks of numbers are available and at the discretion of the Company. Rates and charges associated with sequential numbers are specified in C., following.

A *DID* sequential number block is a group of twenty (20) telephone numbers in numeric order. The last digit of the first number within the block is a zero (0), and the last number within the number block must include an odd number in the sixth digit and a nine (9) in the last digit.

9. Subscribers to *DID* shall be responsible for the mechanical or manual interception of calls placed to lines or numbers not connected for service.

Recurring charges specified for Direct-Inward-Dialing Systems include trunks and dial switching equipment to the extent required to meet Company call completion standards to handle incoming and originating local exchange, message toll, and intercommunicating telephone service and contemplate that telephone users generally will dial originating calls through to completion. Where customer call completion requirements impose additional equipment requirements on the Company equipment, additional charges as specified herein, or based on additional costs, shall apply.

1. Power Failure Transfer

a. Description

Power Failure Transfer (PFT) feature is available to *DID* customers. PFT provides for continuance of communication service to and from the exchange network during a commercial power failure or PBX malfunction at the customer's location. PFT requires a minimum of one 1FB line with the PBX system not affected by the power interruption and is available from all stored program controlled central offices.

3. Expanded Answer For 1A/1E ESS Central Offices

a. Description

Expanded Answer enables customers with Call Forwarding - Don't Answer or Call Forwarding - Busy Line/Don't Answer to forward their unanswered calls to a *DID* station number. This feature includes common equipment and Call Completion Software Positions.

b. Terms and Conditions

- (1) Expanded Answer is furnished only in 1A/1E ESS central offices where adequate and suitable facilities are available. Central offices will be equipped with this feature at the discretion of the Company.
- (2) The Expanded Answer common equipment includes two Call Completion Software Positions (CCSP). Additional CCSPs may be required if the volume of calls attempting to complete to the *DID* station number exceeds the processing limitations of the software.
- (3) Both the *DID* station number and the number equipped with the Call Forwarding - Don't Answer or Call Forwarding - Busy Line/Don't Answer feature must be in the same central office.

4. *DID* Trunk Queuing

a. Description

DID Trunk Queuing is an arrangement whereby incoming calls that are placed to station lines within a *DID* system can be held in queue if all trunks between the central office switch and the customer's PBX are busy. Calls in queue will be held in their order of arrival until a trunk becomes available. Calls in queue are served on a first-in first-out basis. Calls held in queue will hear ringing until answered.

[1] Only applies if Expanded Answer remains in service.

5. EXCHANGE SERVICES

5.3 PRIVATE BRANCH EXCHANGE TRUNKS AND NETWORK ACCESS REGISTERS

5.3.4 DIRECT-INWARD-DIALING (*DID*) SERVICE

D.4. (Cont'd)

b. Optional Features

Delay Announcement

This option allows for incoming calls held in queue to hear a recorded announcement after a predetermined amount of time. The announcement can be accessed a maximum of four times and the customer has the option of providing their own announcement or a standardized Company announcement. Depending upon the customer's choice, ringing, silence or music will be returned after each announcement.

Music on Queue

This option allows for customer provided music to be played to customers held in queue after a recorded announcement has been accessed. This option can only be provided with Delay Announcement.

c. Terms and Conditions

- (1) *DID* Trunk Queuing and its associated options will only be provided where adequate and suitable central office facilities exist.
- (2) The provision of this feature requires that the customer subscribe to a sufficient number of facilities to adequately handle the volume of incoming calls.
- (3) The customer must purchase one queue slot for each call the customer wants to hold in queue. For example, a customer wanting to hold two calls in queue when all lines are busy must have two queue slots in the queue group.
- (4) The music on queue option requires a Voice Grade Channel between the serving central office and a customer-provided music source at the customer's premises.
- (5) The customer must specify the length of time a call is held in queue before going to delay announcement. The customer must also specify the number of announcements (maximum of four) and the amount of time between announcements. Changes to these values may only be made through the issuance of a service order.

5. DID Call Transfer

a. Description

DID Call Transfer allows the user of a specially provisioned, in-only or two-way trunk with DID to transfer any incoming call to another line or trunk outside of the system and then to leave the connection without disconnecting the call.

b. Terms and Conditions

- (1) For the purpose of encouraging customers to try DID Call Transfer, the Company may offer a temporary waiver or partial waiver of any nonrecurring or monthly rate applicable to the service.
- (2) All such offers are subject to facility availability.
- (3) No single offer may be effective for longer than four months.
- (4) Such offers shall be generally available to all similarly-situated customers, but may be limited subject to reasonable distinctions among customers (such as differentiating between existing/new customers).
- (5) A brief description of each promotional offer and information demonstrating that the revenues from that offer cover the incremental cost of providing the service shall be filed with the Minnesota Public Utilities Commission no later than ten days prior to the commencement of each offer.

c. Rates and Charges

5. EXCHANGE SERVICES

5.3 PRIVATE BRANCH EXCHANGE TRUNKS AND NETWORK ACCESS REGISTERS (CONT'D)

5.3.6 NETWORK ACCESS REGISTERS

A. Description

Network Access Registers (NARs) are software in the central office that restrict the number of station calls to and from the exchange network. All station calls to the exchange network are passed through the NARs which are sized for the customer's Common Block. Once the quantity of NARs is surpassed, the calling party receives a busy signal.

NARs permit the dialing of exchange and MTS calls to and from a *CENTRON* system. The number of simultaneous calls between the exchange or MTS network and a *CENTRON* system is limited by the number of NARs to which the customer subscribes. These facilities may be provided as two-way, one-way incoming or a combination thereof.

B. Rates and Charges

Nonrecurring charges apply for connecting or moving telephone service. Equipment charges apply separately unless specified according to components of work required.

1. Flat Rate Network Access Registers

	USOC	NON-RECURRING CHARGE	MONTHLY RATE MINNEAPOLIS/ ST. PAUL OUTSTATE METROPOLITAN
• Two-way[1]	EQA	\$10.00	\$40.37 \$49.20
